SUMMARY

Senior Product Manager with 9 years across product, content and engineering, the last 6 owning revenue-critical B2C product lines at Internshala, one of India's largest learning and placement platforms. I turn ops-heavy, high-touch programs into self-serve, AI-powered funnels that lift conversion, retention and monetization. Track record: grew a product line from Rs 30-40L to Rs 1-2Cr monthly revenue, drove signup conversion 2% to 15%, and led a 0-to-1 PLG launch to 1,000 paid learners. Promoted three times (PM-I to PM-II to SPM); mentored 6 PMs and led cross-functional engineering, ops and AI teams.

CORE SKILLS

Product Strategy & Roadmapping • 0-to-1 & Scaling • Growth & Funnel Optimization • Monetization & PLG • AI-Enabled Products • Experimentation / A/B Testing • Marketplace & Matching Systems • B2C + B2B Execution • Cross-Functional Leadership • Stakeholder Management • SQL & Metabase Analytics

EXPERIENCE

Senior Product Manager, Internshala

Gurugram • Jun 2020 - Present

Owned revenue-critical learner product lines end to end: discovery, monetization, learning experience, placement outcomes and internal tooling.

- Owned product lines contributing 60% of company revenue, driving 20%-plus YoY enrolment growth and a 15% improvement in placement outcomes.
- Grew monthly sales from Rs 30-40L to Rs 1-2Cr by sequencing experiments (job-oriented specializations, then placement-assistance, then placement-guarantee courses) to find product-market fit.
- Led the 0-to-1 launch of Internshala Career Launchpad, a low-ticket AI-led PLG offering that replaced the high-ticket Placement Guarantee line; scaled to 1,000 paid learners at the Rs 2,999 price point.
- Re-architected learner monetization from ops-heavy to self-serve PLG: CAC down ~90%, time-to-activation from 4 days to 10 minutes.
- Drove signup conversion from 2% to 15% and application rate from 10% to 60% by restructuring signup pages, surfacing social proof and outcome metrics, and shortening forms.
- Redesigned the learning experience (unified dashboard, sequential journey, progress trackers), raising first-module adoption 70 to 99%, completion 25 to 44%, and graduation 18 to 30%.
- Rebuilt the placement funnel from user research and RCA, lifting average monthly applications per user from 2-5 to 20-25 and application-to-interview conversion by ~40%.
- Sourced and integrated an AI mock-interview partner at \$0.9-1 per interview (vs a \$3-4 budget) after evaluating 50-plus vendors; improved interview clear rate from 2-3 to 8 of every 10 candidates.
- Bundled an AI feature suite (mock interviews, resume analysis, job matching, project-based learning) into one program: weekly active learners +40%, multi-feature adoption 33%.
- Cut \$17K-plus per year in tooling costs (in-house video player, Google Meet attendance automation, seat reduction) while improving the live-session experience.
- Built SQL/Metabase data infrastructure and cron automation that became leadership's single source of truth and cut manual ops effort 30%+.
- Mentored 6 product managers (APM through PM-II) and directly managed 3.

Senior Content Manager & Educator, Internshala

Gurugram • Oct 2017 -

Jun 2020

- Identified and validated 137 learning categories and launched 90-plus courses now contributing ~19% of company revenue at an average 4.4/5 learner rating.
- Designed and delivered technical curriculum (Android, Java, Python) reaching 5,000-plus learners annually; contributed to a new LMS and led a 12-member teaching-assistant team.

Innovator, Digital Impact Square (TCS Foundation)

Nasik • Jan 2017 - Oct 2017

- MIT Media Lab Emerging Worlds fellow. Co-founded FARMSS (Android + OpenCV soil-nutrient analysis, cutting testing from days to ~20 minutes, taken to pilot) and founded VIKRELA, a street-vendor marketplace.

EDUCATION

B.Tech, Computer Science & Engineering | KIET (AKTU Lucknow), Ghaziabad • 2013-2017 • 78.4%

Founder of Neuron (developer club) and Colloquy (debating club).

TOOLS & STACK

SQL, Metabase, JIRA, Notion, Figma, A/B testing • AI-assisted build: Claude Code, Codex, Antigravity •

Languages: Java, Kotlin, C/C++, Python, ReactJS, NodeJS (working knowledge)
